

CleanDent C2S Pro

SAMARIT

safe patient moving & handling

+ Oral hygiene

is essential for a healthy mouth and breath.

Dentures are rarely cleaned correctly by their owners or by nursing staff.

This is a common problem in retirement homes.

Dentures require specific, regular and meticulous upkeep that is difficult to perform every day.

The consequences should not be underestimated:

Failure to clean and maintain dentures can increase the risk of problems:

On chewing

Sensitivity, pain, etc.

On health

Malnutrition, respiratory tract infection

On numerous illnesses of the oral mucous membrane

Irritation, thrush, increased levels of anaerobic bacteria, pain, etc.

CleanDent

+ A cleaning system

simple and effective for ensuring the long life of dentures.

The C2S Pro cleaning system, developed for daily and restorative cleaning of all types of removable and screw-retained dentures through dynamic brushing with special alloy bristles, helps clean dentures thoroughly and prevents the formation of plaque and tartar.

The C2S PRO eliminates:

Food
particles
encrusted
in dentures

Plaque
that naturally
lines
dentures

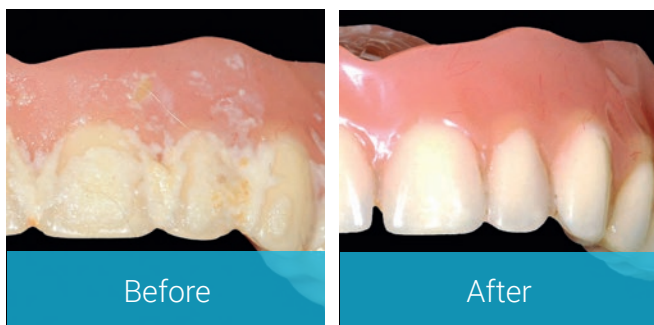

Bacteria
that are often
responsible
for bad breath

Advantages of C2S Pro for nursing staff:

- + Saves time
- + Ease of use
- + Makes cleaning easier
- + Individual cleaning
- + Resident comfort
- + Standardisation of quality of care
- + Optimal denture hygiene

Benefits of C2S Pro for dentures:

- Cleans effectively in 2 minutes
- Removes stains
- Polishes
- Prevents risky movements
- Makes dentures look new again

+ Personalised bowls

prevent cross-contamination and loss of dentures thanks to tracking labels.
